Welcome To Our Application

This platform helps students discover and apply for opportunities using a mobile experience. It also helps employers find suitable candidates efficiently through integrated tools.

About Our Application

Job and Internship Finder Platform is a React Native mobile application built with Expo and Onspace AI APK. It connects students and employers for job and internship opportunities. The application includes seeker and employer experiences for browsing, posting, and managing opportunities.

Application Advantages

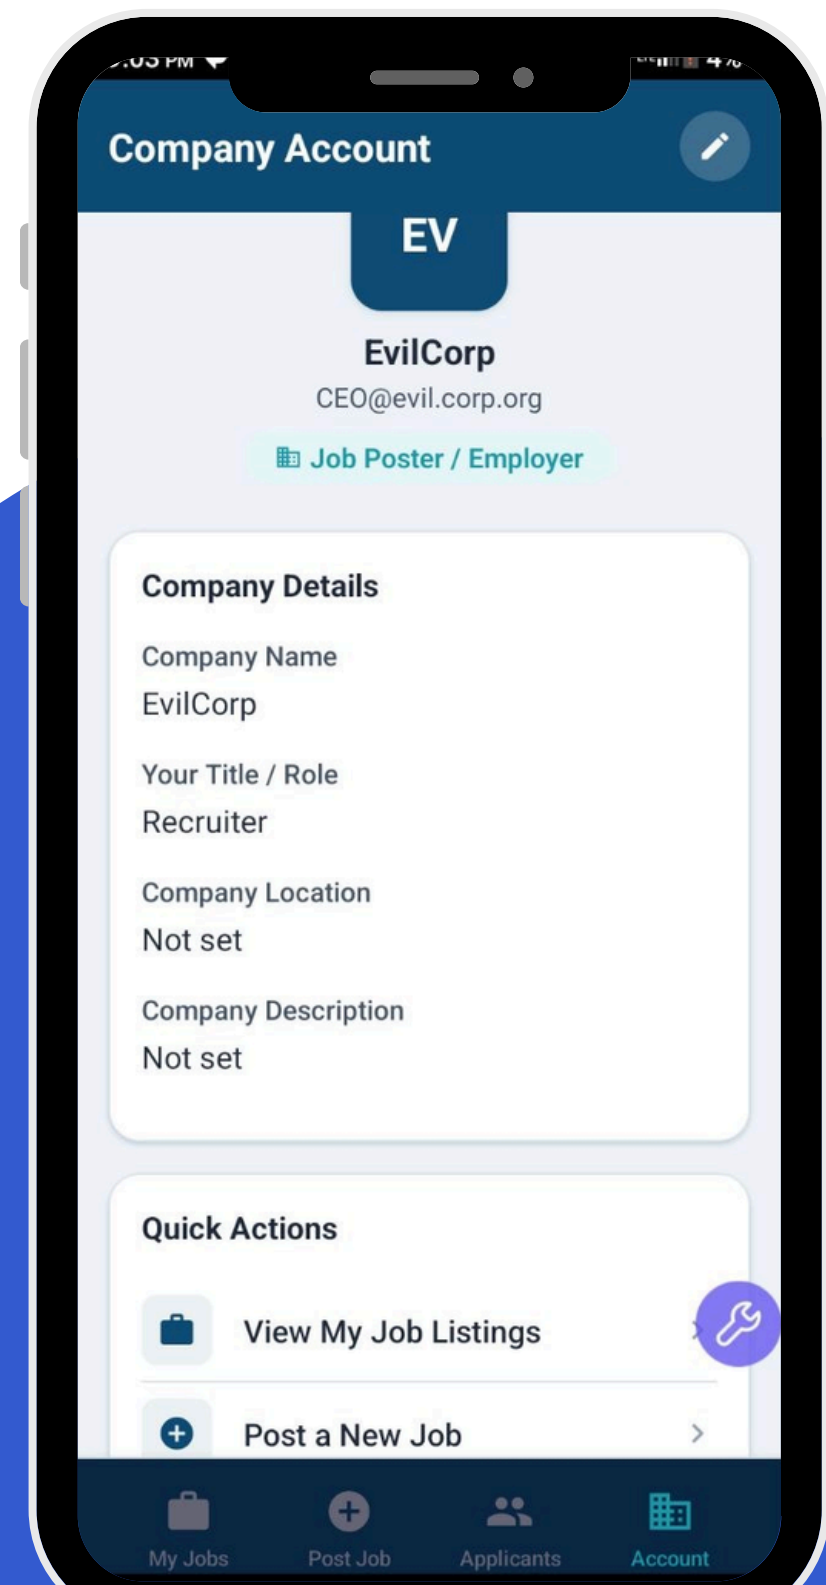

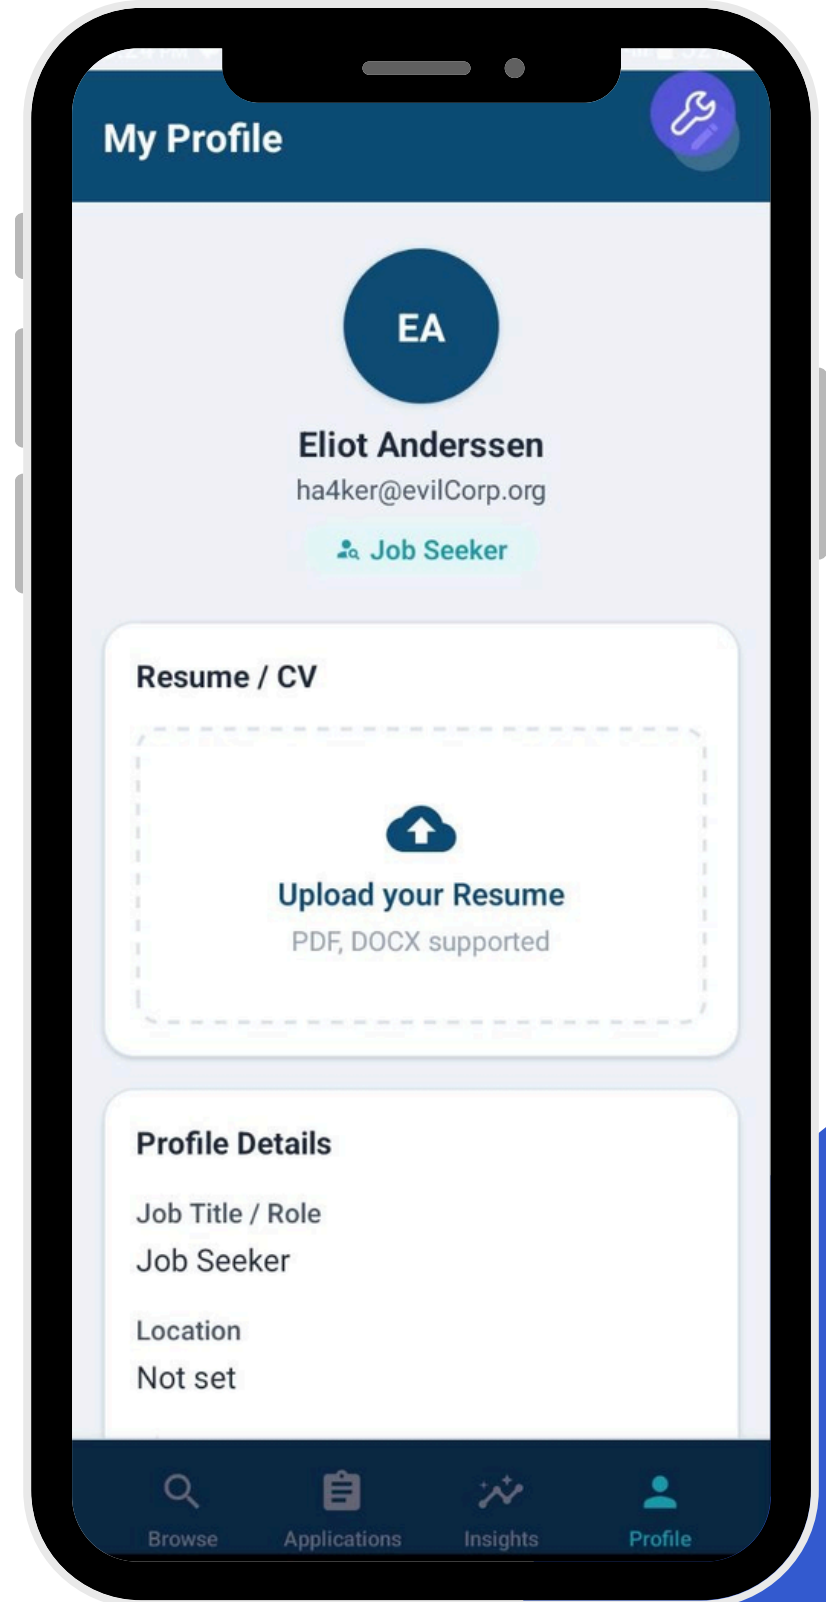

- 01

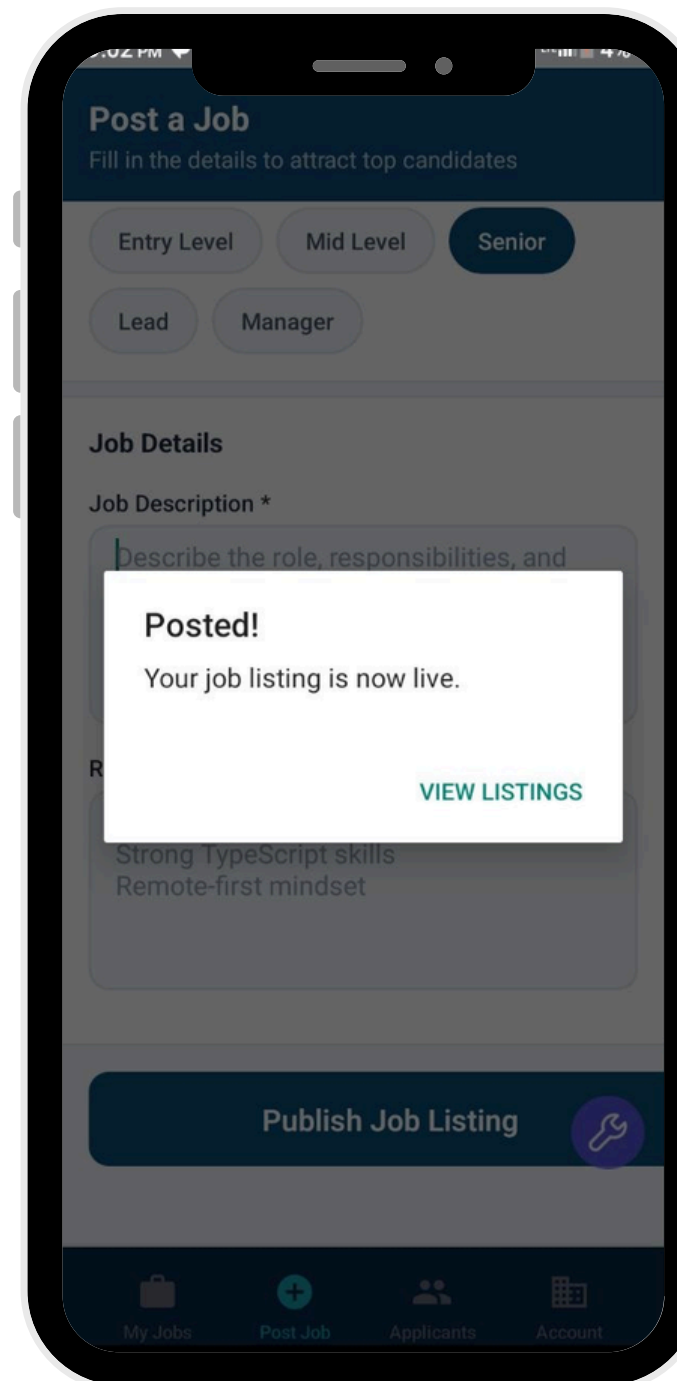

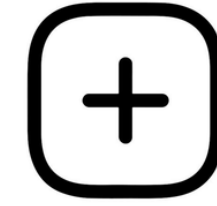

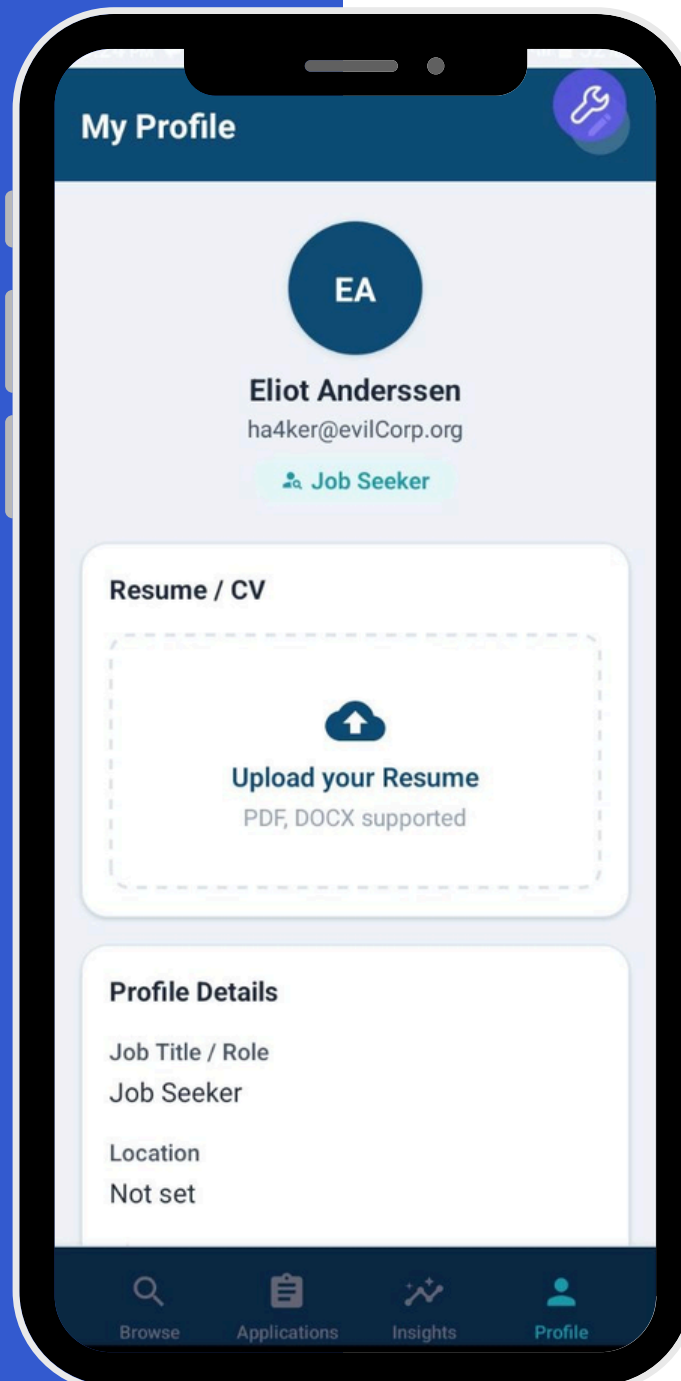

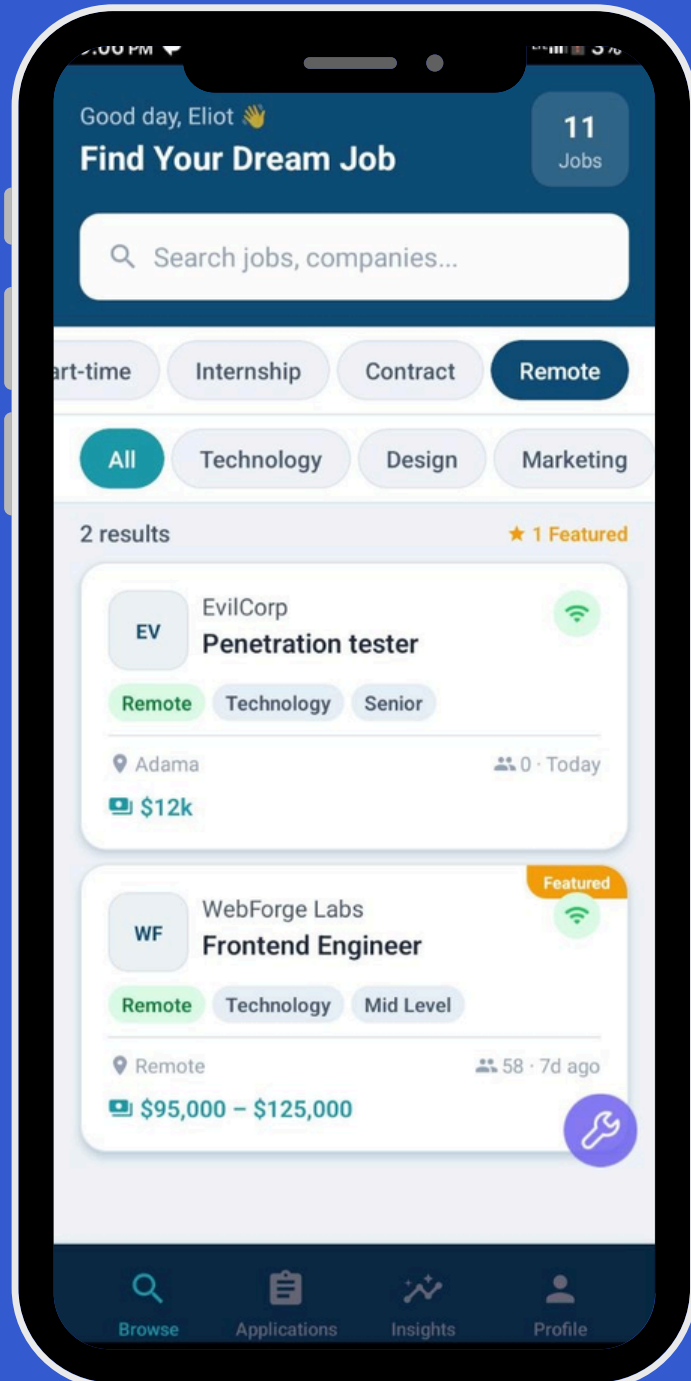

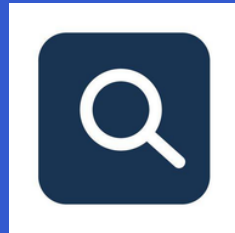

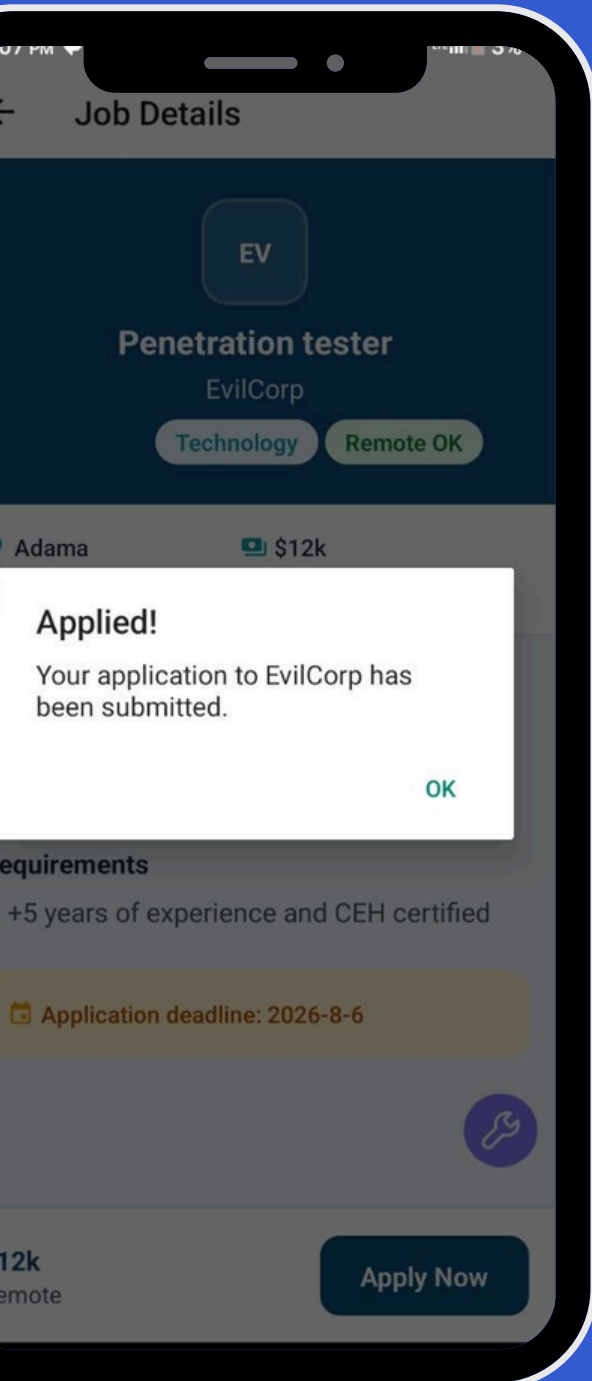

Students can search and apply for jobs or internships, update their profiles, and upload documents.
- 02

Employers can post new jobs, view applicants, and update job postings.
- 03

Administrators can oversee all users, manage posts, and monitor platform activity.
- 04

user-friendly interface to provide an efficient platform for job and internship management tailored to academic institutions and businesses.

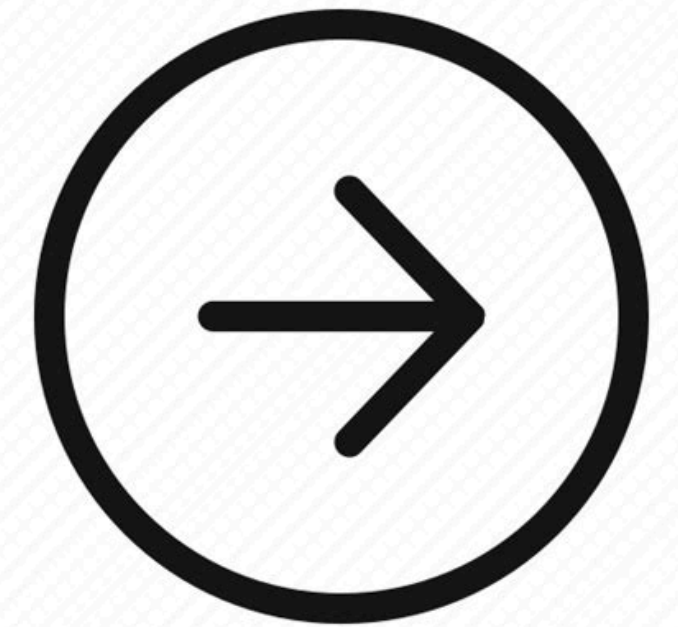

Application Features

- * User Authentication
- * Job & Internship Listings
- * Search and Filtering
- * Resume (CV) Upload
- * Job Application Tracking
- * Employer Job Posting Dashboard
- * Applicant Management
- * In-app Notifications and Messaging
